**Past performance is no guarantee of future results and is not constant over time.**

Performances are calculated by comparing the net asset value at the end of the period to that at the beginning of the period. The figures shown are calculated in the reference currency of the share class. They are calculated after deduction of all charges, with the exception of any entry/exit charges. Net figures do not take account of taxes applicable to the average retail individual client in their country of residence. When the currency shown differs from the client's currency, there is a currency risk that can result in a decrease in value.

## MANAGEMENT TEAM COMMENT

After 2 months of gains, the equity markets closed down -4.18% for the STOXX 600 in Europe, -5.75% for the S&P 500 in the United States and even -7.7% for the Nasdaq. The markets were penalised by Donald Trump's numerous announcements regarding the introduction of tariffs as from 2 April, fuelling concerns about an intensification of the trade war. These tariffs already hit Canadian steel and aluminium at 25%, Chinese products at 20% and European wines and champagnes at potentially 200%! This instability is weighing on investor sentiment and US consumer confidence, especially as Elon Musk's DOGE is launching waves of layoffs at federal agencies. At the same time, geopolitical uncertainty linked to the war in Ukraine and difficulties in reaching an agreement contributed to investors' caution. Economists are therefore revising the US growth outlook downwards. On the positive side, the German parliament passed a major reform, ending the strict debt and deficit limitation policy. This reform frees up the defence budget from the usual budgetary restrictions and establishes a special fund of €500bn over 12 years for infrastructure, with the aim of reviving a struggling economy. Lastly, Chinese data surprised to the upside with industrial production and retail sales boosted by the government stimulus. Against this backdrop, the fund ended the month down -2.32%. Equities contributed -1.9%, in line with the sharp fall in the markets. We arbitrated our Swiss and UK exposure towards the eurozone and especially Germany with the Mdx to take advantage of their stimulus plan. We also increased our weighting in US technology after the sharp fall. The only asset that stands out positively is gold, which serves as a safe haven and which is up nearly 5%
