Past performance is no guarantee of future results and is not constant over time.

Performances are calculated by comparing the net asset value at the end of the period to that at the beginning of the period. The figures shown are calculated in the reference currency of the share class. They are calculated after deduction of all charges, with the exception of any entry/exit charges. Net figures do not take account of taxes applicable to the average retail individual client in their country of residence. When the currency shown differs from the client's currency, there is a currency risk that can result in a decrease in value.

MANAGEMENT TEAM COMMENT

The ECB left its key rates unchanged for the third time and, in addition to inflation figures, will wait for wage growth data to announce a possible rate cut in June. In the United States, all indicators were positive, with GDP up 3.3% on an annualised basis and PCE inflation, an indicator followed by the Fed, rising 2.6% year-on-year in December. Yields thus generally continued their strong movement over the last two months, with the German Bund rising from 2% to 2.16% and the US 10-year rebounding by 40bp from its lowest point. The dollar appreciated from 1.1 to 1.08. The equity markets continued to rally, after a few days of consolidation. Technology stocks drove the indices, with the Nasdaq up nearly 4%, and ASML (+15%) and SAP (+13%) following publications in Europe. Luxury goods stocks, with LVMH up 13% following earnings results, benefited the Paris index. Against this backdrop, the fund ended the month down 1.85%. January was certainly a swing month compared to the strong rebound of the previous two months. We continued to reduce our position in BNPPParibas Smart Food by switching in favour of two Net Zero Ambition trackers, one global and the second more European. In terms of contribution, solar stocks fell sharply after the rebound at the end of the year, thus driving down the Invesco Solar ETF (-19%) for a negative contribution of 40bp, as well as the Schroder Global Transition fund (-10%). The best performers were funds in the Water theme, which posted a positive performance for the most part, such as the Pictet Water fund (+1%).
