**Past performance is no guarantee of future results and is not constant over time.**

Performances are calculated by comparing the net asset value at the end of the period to that at the beginning of the period. The figures shown are calculated in the reference currency of the share class. They are calculated after deduction of all charges, with the exception of any entry/exit charges. Net figures do not take account of taxes applicable to the average retail individual client in their country of residence. When the currency shown differs from the client's currency, there is a currency risk that can result in a decrease in value.

## MANAGEMENT TEAM COMMENT

June was marked by strong geopolitical tensions with the start of the war between Israel and Iran and the intervention of the United States through the bombing of Iranian nuclear sites. Paradoxically, the equity markets remained calm, losing only 1.5% over the 12 days of war despite the risks of a stalemate. Due to fears of refinery bombings or the closure of the Strait of Hormuz, oil soared 22% from 64 to more than 78 dollars only to return to square one after the ceasefire. The markets therefore once again focused on customs duties, for which negotiations could be extended until September. The equity markets thus reached new highs, mainly the Nasdaq (+6.6% over the month). The European markets clearly underperformed the US indices with the Stoxx 600 losing 1.33%. The dollar continued and accelerated its depreciation against all currencies and mainly the euro, dropping 3.9% from 1.135 to 1.179. Fears of an increase in the US budget deficit are certainly starting to worry. Lastly, with regard to the central banks, the ECB cut its rates by 25bp due to the drop in its inflation forecasts, while the Fed kept them unchanged by raising its inflation forecasts.

Against this backdrop, the fund ended the month up 0.07%. The vehicles that contributed the most to performance were those with the highest exposure to technology stocks, despite the burden represented by the depreciation of the dollar. The JPM Reserach Enhanced fund (+5.3% or 1.84% in euros), which gained 33% in technology, and the AB US thematic fund (+1.1% in euros), perfectly illustrate these market movements. Note the excellent contribution of the fund Robeco Smart Energy EUR (14bp), which benefited from its high exposure to semiconductor stocks such as Marvell Techno (+24%) and ON Semiconductor (+21%)
